## New specialty license plates

The bill creates six new specialty license plates. The plates are available to the general public, but require a person to pay an annual contribution when the plate is issued and renewed. The contributions are deposited into the existing License Plate Contribution Fund and later disbursed to the appropriate organizations that receive the contributions. Those organizations work with the Registrar of Motor Vehicles to determine the appropriate logo and words that are displayed on the plates.

In addition to the contribution, the person receiving the specialty license plate must pay an annual \$10 Bureau of Motor Vehicles (BMV) fee. The fee's purpose is to compensate the BMV for the additional services required to issue each specialty license plate. The BMV fee is deposited into the existing Public Safety – Highway Purposes Fund. All other registration requirements apply to the new plates. The new plates may be issued for passenger cars, noncommercial motor vehicles, recreational vehicles, and any other vehicle of a class approved by the Registrar.

The new specialty license plates created by the bill are set forth in the following table.

It also changes the organization designated to receive the \$10 contributions from the sale of the license plate from the Fallen Linemen Organization to the Community Foundation of Ohio's Electric Cooperatives. Finally, it adds that the contributions may be used by the Foundation to recognize and memorialize injured lineworkers and support their families (rather than to memorialize only fallen lineworkers and support their families, as in current law).<sup>20</sup>
