Bill Analysis

Version: As Introduced

Primary Sponsors: Reps. Stein and Brennan

Rocky Hernandez, Attorney

SUMMARY

- Includes energy generated by a nuclear reaction as “green energy.”

DETAILED ANALYSIS

Nuclear energy as green energy

The bill includes energy generated using a nuclear reaction as “green energy.” Under current law, “green energy” means any energy generated by using an energy resource that does one or more of the following:

- Releases reduced air pollutants, thereby reducing cumulative air emissions;
- Is more sustainable and reliable relative to some fossil fuels.

Current law further includes energy generated by using natural gas as a resource as green energy.

The effects of the bill’s inclusion are unclear as the term “green energy” is not used in the Revised Code.
