Firefighters must have been assigned to at least six years of hazardous duty as a firefighter for the presumption to apply. The act also creates the same presumption for firefighters in the Workers' Compensation Law. For the Workers' Compensation Law, the presumption is included in the list of occupational diseases that are compensable, and compensation for cancer under the presumption is payable only in the event of temporary total disability, permanent total disability, or death, in accordance with continuing law. The Workers' Compensation Law provision applies to paid and volunteer firefighters.

**Rebuttal of the presumption**

The act provides that the presumption created by the act can be rebutted in any of the following situations:

- There is evidence that the firefighter incurred the type of cancer being alleged before becoming a member of the fire department.

- There is evidence that the firefighter's exposure, outside of the scope of the firefighter's official duties, to cigarettes, tobacco products, or other conditions presenting an extremely high risk for the development of the cancer alleged, was probably a significant factor in the cause or progression of the cancer.

- There is evidence that the firefighter was not exposed to an agent classified by the IARC as a Group 1 or 2A carcinogen.
