H.B. 172*
135th General Assembly

Occupational Regulation Report

[Click here for H.B. 172's Bill Analysis / Fiscal Note](#)

Primary Sponsor: Rep. Swearingen

Impacted Profession: Notaries public

Jill Rowland, Attorney

LSC is required by law to issue a report for each introduced bill that substantially changes or enacts an occupational regulation. The report must: (1) explain the bill's regulatory framework in the context of Ohio's statutory policy of using the least restrictive regulation necessary to protect consumers, (2) compare the regulatory schemes governing the same occupation in other states, and (3) examine the bill's potential impact on employment, consumer choice, market competition, and cost to government.¹

LEAST RESTRICTIVE REGULATION COMPARISON

Ohio's general regulatory policy

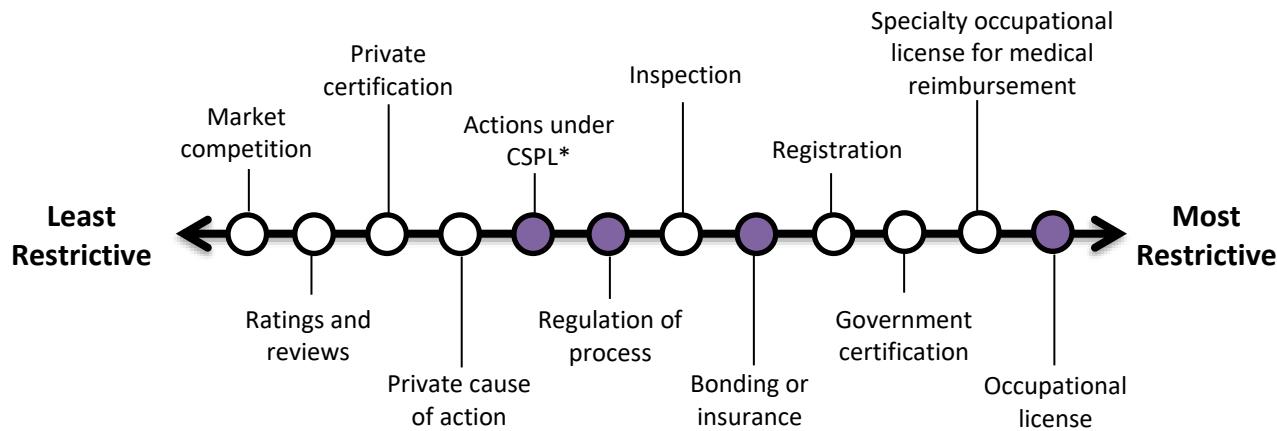

The general policy of the state is reliance on market competition and private remedies to protect the interests of consumers in commercial transactions involving the sale of goods or services. For circumstances in which the General Assembly determines that additional safeguards are necessary to protect consumers from "present, significant, and substantiated harms that threaten health, safety, or welfare," the state's expressed intent is to enact the "least restrictive regulation that will adequately protect consumers from such harms."²

The degree of "restrictiveness" of an occupational regulation is prescribed by statute. The following graphic identifies each type of occupational regulation expressly mentioned in the state's policy by least to most restrictive:

* This report addresses the "As Introduced" version of H.B. 172. It does not account for changes that may have been adopted after the bill's introduction.

¹ R.C. 103.26, not in the bill.

² R.C. 4798.01 and 4798.02, neither in the bill.

H.B. 172 provides for the electronic execution of wills and certain other legal documents. In doing so, the bill subjects a notary public who notarizes such an electronic document to new requirements and related disciplinary action as well as potential new liability. Specifically, the bill makes the following changes:

- Bonding or insurance:** Prohibits a notary public from notarizing an electronic estate planning document unless the notary has obtained a bond plus an errors and omissions insurance policy (each in the amount of at least \$25,000) and has filed proof of doing so with the Secretary of State's office;³
- Occupational licensure:** Allows suspension or revocation of a notary commission, which meets the state policy's definition of an "occupational license," for violating the bill's bonding or insurance provisions;⁴
- Regulation of process:** Creates new process requirements for a notary public who is acknowledging an electronic will and requires a notary to follow continuing law governing electronic or online notarization when acknowledging an electronic power of attorney, durable power of attorney for health care, or living will;⁵ and
- Actions under the Consumer Sales Practices Law (CSPL):** Expands the CSPL's definition of "consumer transaction" to include a notary public's services to a testator during the execution of an electronic will, thus potentially subjecting the notary to liability for damages and attorney fees in an action brought under the CSPL.⁶

³ R.C. 147.591(E) and (F).

⁴ R.C. 147.591(E) and (F); R.C. 147.032 and 4798.01, neither in the bill.

⁵ R.C. 2107.03(C), 147.591, 1337.12(C), 1337.25(B), and 2133.02(B); R.C. 147.60 to 147.66, not in the bill.

⁶ R.C. 1345.01; R.C. 1345.09, not in the bill.

Necessity of regulations

H.B. 172's sponsor, Representative D.J. Swearingen, testified that the bill modernizes the process of executing estate planning documents. He explained that, under current Ohio law, although a will may be created electronically, it must be printed and then signed, witnessed, and notarized in person. He asserted that these requirements present unnecessary, antiquated barriers to executing estate plans. Furthermore, he indicated that these barriers are particularly burdensome for those with mobility issues, lack of means, or limited access to transportation.

Representative Swearingen stated that the bill addresses these problems by allowing Ohioans to sign, witness, and notarize wills and other estate planning documents entirely online via electronic means and video documentation. He testified that the bill not only maintains the safeguards in place today but also enhances them. He said that, under the bill, a document signed online must meet the same standards (such as requiring the testator be of sound mind) as a document that is signed in person. Beyond this, the bill requires the online execution process to be recorded on video; Representative Swearingen asserted that this reduces the likelihood of fraud. Finally, he pointed out that the electronically executed documents can be saved on an encrypted cloud server so that they cannot be tampered with, lost, or destroyed.

In summary, Representative Swearingen testified that allowing estate planning documents to be executed online provides Ohioans with greater access to the security and peace of mind that an estate plan provides.⁷

Restrictiveness of regulations

Licensure

Licensure is the most restrictive of all regulatory options identified within the state's continuum of regulations. Accordingly, the state's policy prescribes a narrow range of situations in which required licensure is appropriate, specifically, when all of the following circumstances are present:

- The occupation involves providing a service regulated by both state and federal law;
- The licensing framework allows individuals licensed in other states and territories to practice in Ohio; and
- The licensing requirement is based on uniform national laws, practices, and examinations that have been adopted by at least 50 U.S. states and territories.⁸

⁷ See [Representative D.J. Swearingen Sponsor Testimony](#), available on the General Assembly's website, legislature.ohio.gov, by searching for "HB 172" and looking under the "Committee Activity" tab.

⁸ R.C. 4798.02, not in the bill.

Continuing Ohio law requires a person who acts as a notary public to hold a commission. Because certain personal qualifications, such as completing an educational program, must be met to obtain a notary commission, it functions as an occupational license under the state's policy.⁹

Neither current law nor the bill satisfies the state policy's first criterion regarding concurrent state and federal regulation. Although notarization is regulated by state law, there is no federal regulatory framework governing notaries public, and notarization generally is not regulated by federal law. (However, certain federal laws do regulate aspects of notarization. For example, the federal E-Sign Law – which specifically exempts wills – authorizes notarization, when required by law, to be done electronically.)¹⁰

The state policy's second criterion regarding licensure of out-of-state individuals is satisfied by continuing law unchanged by the bill. Specifically, a reciprocity provision in the Ohio Notary Law requires the Secretary of State to do the following:

- Issue a commission to an applicant who is commissioned or licensed as a notary public in another state; and (if applicable)
- Issue a written authorization to perform online notarizations to an applicant who holds an authorization or license to perform online notarizations in another state.¹¹

Beginning December 29, 2023, the Secretary of State must issue the commission or authorization to the out-of-state applicant in accordance with the Occupational License Reciprocity Law.¹² Among its provisions, that law generally requires an applicant to have held the out-of-state commission, authorization, or license for at least one year immediately preceding the application date and to have been actively practicing for at least one of the preceding five years.¹³

In addition, all states recognize the validity of a notarial act performed before a notary public in another state as having the same legal effect as an act performed by a notary in that state.¹⁴ In Ohio, this is accomplished via the Uniform Recognition of Acknowledgements Act, which is included in the Ohio Notary Law. The Act specifies that it must be so interpreted as to make uniform the laws of all states that enact it.¹⁵

⁹ R.C. 147.01 and 4798.01(B), neither in the bill.

¹⁰ 15 United States Code 7001(g), 7002, and 7003(a).

¹¹ R.C. 147.01 and 147.63, neither in the bill.

¹² R.C. Chapter 4796.

¹³ R.C. 4796.03(B), not in the bill.

¹⁴ R.C. 147.51, not in the bill. See also [The Enduring Benefits of Interstate Recognition of Notarial Act Laws \(PDF\)](#), which may be accessed by conducting a keyword search "Interstate recognition" and clicking on "Special Reports and Articles" on the National Notary Association (NNA) website: [nationalnotary.org](#).

¹⁵ R.C. 147.57 and 147.58, neither in the bill.

Neither current law nor the bill satisfies the state policy's third criterion because notary licensure laws are not consistent across the nation. According to the National Notary Association (NNA), all of the U.S. states and territories and the District of Columbia require a person to hold a commission to act as a notary public, but the licensure laws vary from state to state and lack uniformity.¹⁶ Additionally, while the NNA has drafted a Model Notary Act for legislators to use when considering changes to state notary laws, it does not appear that the Ohio Notary Law¹⁷ is based on the model act.¹⁸

License suspension or revocation for lack of bond or insurance

The bill increases restrictiveness by expanding the reasons for which the Secretary of State may suspend or revoke a notary commission. The bill adds that the commission may be suspended or revoked if a notary public notarizes specified electronic documents without obtaining the bond or the errors and omissions insurance policy required under the bill.¹⁹

Bond and insurance

Under the state's general policy on occupational regulations, a bonding or insurance requirement is appropriate when the intent of the regulation is to protect against potential damages to third parties and other types of externalities.²⁰

The bill appears to meet this criterion with respect to its requirement that a notary public file and maintain a surety bond with the Secretary of State before notarizing specified electronic estate planning documents.²¹ According to the NNA, a notary bond does not protect notaries. Rather, it protects the public from financial harm in the event the notary makes a mistake or omission or performs a wrongful act in notarizing a document. For this purpose, 31 states require a notary bond ranging in minimum amounts from \$500 to \$25,000. If a notary fails to perform notarial duties in accordance with the law, the company that issues the bond pays the financially injured person any damages up to the amount of the bond.²²

¹⁹ R.C. 147.591(E) and (F); R.C. 147.032, not in the bill.

²⁰ R.C. 4798.02(B)(3), not in the bill.

²¹ R.C. 147.591(E).

²² [Notary Surety Bonds: FAQs](#), which may be accessed by conducting a keyword search "surety bond" on the NNA website: nationalnotary.org.

The bill's requirement that a notary public obtain errors and omissions (E&O) insurance before notarizing specified electronic documents does not appear to meet the state policy's criterion regarding protection of third parties.²³ The NNA specifies that E&O insurance generally protects the notary (not third parties) for unintentional mistakes or omissions made while notarizing, for forgery of the notary's signature or seal, or for false claims made against the notary. If a claim is made against a notary's surety bond for such reasons, the E&O insurance protects the notary for losses in the surety bond that the notary otherwise would be required to pay.²⁴

Prohibition regarding notarization of certain electronic documents

The bill appears to increase restrictiveness by prohibiting a notary public from notarizing an electronic document that is a will, trust, power of attorney, or other estate planning document identified in rule by the Secretary of State unless the notary has filed with the Secretary of State's office satisfactory evidence of having obtained both a bond and E&O insurance.

The bond and E&O insurance both must be:

- In effect at the time of the notarization;
- In the amount of at least \$25,000; and
- On terms specified in rule by the Secretary as reasonably necessary to protect the public.

In addition, the bond must be:

- Payable to any individual harmed by a notary's breach of duty acting in the official capacity as a notary public; and
- Conditioned on the notary's faithful discharge of the duties of the notary public office.²⁵

These bonding and E&O insurance requirements appear to increase restrictiveness for notaries because the current Ohio Notary Law contains no such requirements for notarization of any type of document. However, from a different angle, the bill potentially could be viewed as decreasing restrictiveness somewhat because it expands a notary's scope of practice by requiring notarization of a new form of will that is executed, signed, and witnessed electronically.

Process regulation

The state's policy does not provide specific guidance as to when a regulation of process is the best means of protecting the health, safety, and welfare of consumers. However, the policy as a whole suggests that regulations of process are the most preferred method of regulation

²³ R.C. 147.591(F).

²⁴ [Surety Bonds and E&O Insurance: Know the Difference](#), which may be accessed by conducting a keyword search "Surety Bonds and E&O Insurance" then clicking on the "Blog" box on the NNA website: nationalnotary.org.

²⁵ R.C. 147.591(E) and (F).

when market competition, ratings and reviews, private certifications, private causes of action, and actions under the state's Consumer Sales Practices Law do not provide sufficient protection.²⁶

Whether these mechanisms are a sufficient means of protecting consumers is a policy decision. However, continuing Ohio law establishes several process regulations that govern notary services. For example, it establishes requirements for the performance of electronic notarizations. This entails the notary public's physical presence at the signing of an electronic document, and for online notarizations, which (rather than requiring the notary's physical presence at the signing) are done via two-way video and audio technology.²⁷

Electronic wills

An Ohio court has recognized the validity of a will that is executed and signed electronically rather than via paper and pen.²⁸ However, current law requires a will to be signed by the testator (or by another person in the testator's conscious presence and at the testator's express direction). The will also must be attested and subscribed by two or more competent witnesses in the testator's conscious presence. Under current law, the meaning of "conscious presence" specifically excludes presence via telephonic, electronic, or other distant communication.²⁹ Therefore, a will currently may be executed and signed electronically, but the witnesses (and, if applicable, the person signing the will on the testator's behalf) must be physically present with the testator when the signing occurs. (Current law does not require a will to be notarized.)

With regard to a will that is executed electronically, the bill generally maintains the signing and witnessing requirements, except that it allows those acts to be performed in the physical *or* electronic presence of the testator. The bill defines "electronic presence" to include individuals in different locations communicating in real time (such as via video conferencing).³⁰

Current law does not require a will to be notarized (but they sometimes are). Thus, the bill appears to increase restrictiveness by establishing new requirements with which a notary public must comply when notarizing an electronic will. Specifically, the notary must do all of the following:

²⁶ R.C. 4798.01, not in the bill.

²⁷ R.C. 147.591 and 147.60 to 147.66, neither in the bill.

²⁸ [Technology--Probate: Ready or Not, Here They Come: Electronic Wills are Coming to a Probate Court Near You](#) (citing *In re Estate of Castro*, No. 2013ES00140 (Ohio Ct. Common Pleas, Probate Division, Lorain County, June 19, 2013)), which may be accessed by conducting a keyword search "Technology—Probate: Ready" on the American Bar Association website: americanbar.org.

²⁹ R.C. 2107.03.

³⁰ R.C. 2107.01(E) and 2107.03(C).

- Attest that the testator appears to be of sound mind and not subject to duress, fraud, or undue influence (or terminate the notarization proceedings if there is reasonable cause to believe otherwise);
- Before the notarization, require the testator and witnesses to present government-issued identification credentials and perform related analysis and identity proofing; and
- Perform the notarization through an electronic or online notarization.³¹

Certain other electronically executed legal documents

The bill requires a notary public to comply with existing requirements in the Ohio Notary Law that govern electronic or online notarization when notarizing an electronic power of attorney, durable power of attorney for health care, or living will.³² Rather than increasing restrictiveness by subjecting a notary to new or additional requirements, this provision appears merely to clarify that these portions of the current Ohio Notary Law apply to notarization of the specified documents when they are electronically executed.

Actions under the Consumer Sales Practices Law

The Consumer Sales Practices Law (CSP) aims to protect consumers from unfair, deceptive, or unconscionable acts or practices in connection with the transfer of goods or services intended for the home or for personal use. For a violation of that Law, a consumer may sue and is entitled to pursue a variety of remedies, including recovery of actual economic damages, noneconomic damages and, if the violation was committed knowingly, reasonable attorney's fees.³³ In addition, if specified criteria are met, the Ohio Attorney General may bring certain actions for a violation.³⁴

The state's policy does not provide specific guidance as to when actions under the CSP are the best means of protecting the health, safety, and welfare of consumers. However, the policy as a whole suggests that those actions are the most preferred method of regulation when market competition, ratings and reviews, private certifications, and specific private causes of action do not provide sufficient protection.³⁵ Whether these mechanisms are a sufficient means of protecting consumers is a policy decision.

Thus, it is somewhat unclear whether the state's CPS-related policy is satisfied by the bill, which applies the CSP to electronic will notarization.³⁶ However, it may be argued that this application of the CSP is an appropriate means of protecting testators and their heirs, given that

³¹ R.C. 2107.03(C).

³² R.C. 2107.03(C), 147.591, 1337.12(C), 1337.25(B), and 2133.02(B); R.C. 147.60 to 147.66, not in the bill.

³³ R.C. 1345.09, not in the bill.

³⁴ R.C. 1345.07, not in the bill.

³⁵ R.C. 4798.01, not in the bill.

³⁶ R.C. 1345.01(A).

they could experience considerable harm if a will is executed in an unfair, deceptive, or unconscionable manner.

With respect to notarization of electronic wills, some could argue that this application of the CSPL is particularly appropriate because, under the bill, the execution of an electronic will does not involve the safeguard of requiring witnesses to be in the *physical* presence of the testator at the will's signing. The bill replaces this physical presence safeguard with the safeguard of notarization, a service that deters fraud and provides assurance that a will is authentic and trustworthy. Under the bill, notarization of an electronic will demonstrates that the testator (or the individual signing the will in the testator's name) appeared before the notary public, that the testator is of sound mind and not subject to duress, fraud, or undue influence, and that the notary obtained the required proof of the testator's and witnesses' identities. Applying the CSPL to electronic will notarization therefore could be viewed as an appropriate means of ensuring that the notary public provides that important service in a lawful and ethical manner so as to best protect the testator and heirs.³⁷

Liability concerning notarization of electronic wills

The bill increases restrictiveness by, as noted above, expanding the definition of "consumer transaction" for purposes of the CSPL to include services provided by a notary public to a testator in the notarization of an electronic will.³⁸ By doing so, the bill subjects a notary public to potential liability for damages and attorney's fees in a court action brought for a related violation of the CSPL (as well as to equitable remedies such as injunctive relief).³⁹

IMPACT STATEMENT

Opportunities for employment

The bill's provisions for electronic filing of wills, powers of attorney, and transfer on death designations may give rise to opportunities for employment of persons with skills related to rendering electronic filing services. Persons with backgrounds in electronic document filing and retrieval may benefit from increased demand for such skills and expertise. The extent of these resulting additional opportunities is uncertain.

Consumer choice

The bill would give persons an additional way to accomplish the objectives met by the documents that it would allow to be filed electronically. To this extent it would expand consumer choice.

³⁷ R.C. 2107.03(C).

³⁸ R.C. 1345.01(A).

³⁹ R.C. 1345.09, not in the bill.

Market competition

As noted above, the bill may enhance demand for persons with skillsets related to electronic filing of documents. In addition, demand for related hardware for electronically filing of documents may increase.

Cost to government

For the costs of the bill to government, please see the [LBO fiscal note \(PDF\)](#).

SUMMARY OF PROPOSED REGULATIONS

Secretary of State's rules

The bill requires the Secretary of State to adopt rules specifying both of the following:

- The types of electronic estate-related documents that require a bond and errors and omissions insurance;
- Other terms and conditions the Secretary considers reasonably necessary to protect the public.⁴⁰

Database of notaries public

Continuing law requires the Secretary of State to maintain a database of notaries public on a publicly accessible website. The bill adds that the database must include information regarding whether a notary has filed evidence satisfactory to the Secretary of State that the notary has obtained the bond and the errors and omissions insurance that are required under the bill to notarize specified electronic estate planning documents.⁴¹

Other provisions

For a complete explanation of the bill, please see the [LSC bill analysis \(PDF\)](#).

⁴⁰ R.C. 147.591(G).

⁴¹ R.C. 147.051(D).

COMPARISON TO OTHER STATES

The bill requires a notary to obtain a surety bond plus an errors and omissions insurance policy. All of the states surrounding Ohio except West Virginia likewise require a notary to submit a surety bond, but none of those states have enacted an insurance requirement.

Ohio and the surrounding states authorize a notary to be disciplined for prohibited conduct. Under the bill, this includes failure to obtain the required bond and insurance. Indiana, Kentucky, and Pennsylvania also specifically include failure to maintain the required surety bond as grounds for discipline.

The bill allows electronic execution of wills, powers of attorney, living wills, and durable powers of attorney for health care. The surrounding states vary regarding whether these documents may be executed electronically and whether they must be notarized. However, it appears that Ohio and all of the surrounding states, except Kentucky, generally allow notaries to perform notarial acts electronically.

The table below explains these provisions in more detail.

Notaries Public			
State	Bonding or Insurance Requirements	Requirements for Notarizing Electronic Wills, Powers of Attorney (for Health Care and Otherwise), and Living Wills	Disciplinary Actions
Ohio (under the bill)	<p>Prohibits a notary from notarizing an electronic estate planning document unless the notary has obtained a \$25,000 bond plus a \$25,000 errors and omissions insurance policy and has filed corresponding proof with the Secretary of State.</p> <p>(R.C. 147.591(E) and (F))</p>	<p>Authorizes and establishes requirements for electronic execution of wills, powers of attorney, living wills, and durable powers of attorney for health care.</p> <p>Requires a notary to follow continuing law governing electronic or online notarization when acknowledging those documents.</p> <p>Regarding an electronic will, requires the testator and witnesses to present satisfactory identification to the notary and attest that the</p>	<p>Allows suspension or revocation of a notary commission for violating the bill's bonding or insurance provisions.</p> <p>Applies the CSPL to electronic will notarization, thus potentially subjecting the notary to liability for damages and attorney fees in an action brought under that law.</p>

Notaries Public			
State	Bonding or Insurance Requirements	Requirements for Notarizing Electronic Wills, Powers of Attorney (for Health Care and Otherwise), and Living Wills	Disciplinary Actions
		testator appears to be of sound mind and not subject to duress, fraud, or undue influence. <i>(R.C. 1337.12, 1337.25, 2107.03, and 2133.02)</i>	<i>(R.C. 147.591(E) and (F) and 1345.01; R.C. 147.032, 1345.09, and 4798.01, not in the bill)</i>
Indiana	Requires an applicant for a notary commission to submit a \$25,000 surety bond and prohibits a notary from performing notarial acts during a period not covered by the surety bond. <i>(Ind. Code 33-42-0.5-4 and 33-42-12-1(c) and (d))</i>	Does not require electronic wills, powers of attorney, or advance directives (living wills, health care powers of attorney, and anatomical gifts) to be notarized if they are signed in the presence of witnesses. <i>(Ind. Code 16-36-7-28(b), 16-36-7-2, 29-1-21-4, and 30-5-11-4)</i> Generally requires a notary who performs a notarial act on an electronic record to include the same information and seal as is required for notarization of non-electronic records. <i>(Ind. Code 33-42-9-12)</i>	Any act or omission that demonstrates a deficiency of incompetence, honesty, integrity, or reliability, including failure to maintain a surety bond. <i>(Ind. Code 33-42-13-1(c))</i>
Kentucky	Requires an applicant for a notary commission to submit a \$1,000 surety bond to the county clerk and prohibits a notary from performing notarial acts during a period when a valid bond is not on file. <i>(Ky. Rev. Stat. 423.390(4) and (5))</i>	Does not authorize the electronic execution of wills, powers of attorney, living wills (including anatomical gifts), or designations of health care surrogates. <i>(Ky. Rev. Stat. 394.040, 457.050, 311.623, and 311.629)</i>	Any act or omission that demonstrates the individual lacks the honesty, integrity, competence, or reliability to act as a notary public, including failure to maintain a surety bond. <i>(Ky. Rev. Stat. 423.395)</i>

Notaries Public			
State	Bonding or Insurance Requirements	Requirements for Notarizing Electronic Wills, Powers of Attorney (for Health Care and Otherwise), and Living Wills	Disciplinary Actions
Michigan	Requires an applicant for a notary appointment to file a \$10,000 surety bond with the county clerk. <i>(Mich. Comp. Laws 55.273)</i>	Does not statutorily authorize electronic execution of wills, powers of attorney, or designations of patient advocates (including authority to make anatomical gifts), and does not recognize living wills <i>(Mich. Comp. Laws 700.2504, 700.2519, 700.5501, and 700.5507)</i>	Engaging in prohibited conduct, which includes committing an act of fraud or deceit, false advertising, and charging a fee in excess of that allowed by the law governing notaries public. <i>(Mich. Comp. Laws 55.300a)</i>
Pennsylvania	Requires an applicant for a notary commission to file a \$10,000 surety bond with the Department of the State of the Commonwealth and prohibits a notary from performing notarial acts during a period when a valid bond is not on file. <i>(57 Pa. Cons. Stat. 321)</i>	Does not authorize electronic execution of wills. <i>(73 Pa. Stat. 2260.104(b); 20 Pa. Cons. Stat. 2502)</i> Authorizes electronic execution of power of attorney, which must be witnessed by two adults and notarized. <i>(20 Pa. Cons. Stat. 5601(b) and 5602(c))</i> Authorizes a living will or health care power of attorney to be “in any written form” and requires it to be witnessed by two adults (but does not require notarization). <i>(20 Pa. Cons. Stat. 5442(b), 5447, 5452(b), and 5465)</i> Allows notaries to perform notarial acts electronically. <i>(57 Pa. Cons. Stat. 302 et seq.)</i>	Any act or omission that demonstrates the individual lacks the honesty, integrity, competence, or reliability to act as a notary public, including failure to maintain the required surety bond. <i>(57 Pa.
