Bill Analysis

Lisa Musielewicz

S.B. 128 131st General Assembly (As Introduced)

Sens. Cafaro and Schiavoni

BILL SUMMARY

• Designates May 30 of every year as "Bartter Syndrome Awareness Day."

CONTENT AND OPERATION

Bartter Syndrome Awareness Month

The bill designates May 30 of every year as "Bartter Syndrome Awareness Day."1

Bartter syndrome is a group of similar kidney disorders that cause an imbalance of potassium, sodium, chloride, and other molecules in the body. In some cases, the condition manifests before birth with increased amniotic fluid surrounding the affected fetus (polyhydramnios). Affected infants typically do not grow and gain weight as expected. Dehydration, constipation, and increased urine production result from losing too much salt in the urine, and weakening of the bones can occur due to excess loss of calcium. Low levels of potassium in the blood (hypokalemia) can cause muscle weakness, cramping, and fatigue.²

The exact prevalence of Bartter syndrome is unknown, although it likely affects about one per million people worldwide. The condition is inherited in an autosomal recessive pattern, which means both copies of the gene in each cell have mutations. The parents of an individual with an autosomal recessive condition each carry one copy of
